# FORD LTD — WHAT'S NEW FOR 1980

- New model alignment: LTD S, LTD and LTD Crown Victoria in sedan models and LTD S model added to station wagon line up

## Technical

- New four-speed automatic transmission with integral overdrive (optional on all models with 5.8L (351 CID) engine and on sedans with 5.0L (302 CID) engine)
- New Electronic Engine Controls monitor and adjust engine functions for optimum efficiency and emissions (standard on all 5.8L engines and 5.0L engines with California Emission System)
- Standard P-metric radial ply tires designed to run at higher inflation pressure for reduced rolling resistance
- Upgraded sound insulation packages
- Standard maintenance-free battery
- Dual halogen headlamps standard on all models except LTD S
- Revised body mounts for improved NVH/ride

## Exterior

- Standard front bumper guards
- Simulated woodgrain panels with planking lines on Country Squire
- New hood ornament design on LTD Crown Victoria and Country Squire
- New black rocker panel moldings and new lower bright moldings with rear extensions on LTD Crown Victoria

- New rear half vinyl roof with frenched seams and brushed aluminum roof wrapover molding on LTD Crown Victoria
- Revised bodyside paint stripes on LTD Crown Victoria
- New decklid tape stripes on LTD and Crown Victoria Sedans, tailgate stripes on LTD Wagon

## Interior

- Revised luxury instrument panel standard on LTD Crown Victoria and Country Squire
- Crown Victoria-level door trim panel and 18-oz. cut-pile carpeting standard on Country Squire
- Seat belt reminder chime standard on LTD Crown Victoria and Country Squire

## Options

- Traction-Lok axle
- Cast aluminum wheels
- Autolamp on/off/delay system
- Leather trim
- Leather-wrapped luxury steering wheel
- Electronic AM/FM Stereo Search radio
- Electronic AM/FM Stereo Search radio with Cassette Tape Player and Dolby® Noise Reduction System
- Pivoting front vent windows
- Dual illuminated visor vanity mirrors (NA LTD S models)
- Automatic parking brake release
- 15-inch wheels and tires

## FORD LTD — COLOR AND TRIM SELECTIONS

Exterior and interior color combinations shown as "available" have been established as most attractive to the average customer. Orders for combinations not shown may be submitted, provided the original order carries a notation

stating the exterior and interior selection has been verified and is definitely desired. Colors and codes referenced are the same as those shown in your Color and Trim Book.

# FORD LTD S — MAJOR STANDARD FEATURES

## MODEL

4-DOOR SEDAN

## EXTERIOR

- Chrome-plated bumpers, front and rear
- Front bumper guards
- Chrome-plated grille
- Auxiliary "road lamps" in grille
- Single rectangular headlamps
- Bright door belt, rocker panel, wheelip and drip rail moldings
- Tiltaway door hinges
- Deluxe wheel covers
- Color-keyed rear license plate housing

## INTERIOR

- Full bench seat with cloth and vinyl seat trim
- Thick foam cushions with Flex-o-later supports
- 10-oz. color-keyed cut-pile carpeting
- All vinyl door trim panels with woodtone inserts
- Color-keyed instrument panel
- Illuminated bin-type glove box
- Deluxe color-keyed 4-spoke steering wheel
- Steering column multi-function levers with controls for: turn signals, horn, headlamp dimmer and windshield wipers/washers
- Cigar lighter in illuminated instrument panel ashtray
- Full width luggage compartment mat on floor and "kick-up" area
- Deep well trunk with low liftover height
- Mini-spare tire

## FUNCTIONAL

- 5.0 Liter (302 CID) VV V-8 engine
- DuraSpark electronic ignition
- Electronic voltage regulator
- SelectShift Automatic Transmission
- Power steering
- Power front disc/rear drum brakes
- Coolant recovery system
- P205/75R14 BSW steel-belted radial ply tires
- Maintenance-free battery

See page 15 of this section for complete list of standard equipment.

# FORD LTD — MAJOR STANDARD FEATURES

## MODELS

2-DOOR SEDAN  
4-DOOR SEDAN

## EXTERIOR

- Deluxe color-keyed 4-spoke steering wheel
- Steering column multi-function levers with controls for: turn signals, horn, headlamp dimmer and windshield wipers/washers
- Cigar lighter in illuminated instrument panel ashtray
- Full width luggage compartment mat on floor and "kick-up" area
- Deep well trunk with low liftover height

## FUNCTIONAL

The Ford LTD incorporates all the features of the LTD S including:

- 5.0 Liter (302 CID) VV V-8 engine
- DuraSpark electronic ignition
- Electronic voltage regulator
- SelectShift Automatic Transmission
- Power steering
- Power front disc/rear drum brakes
- Coolant recovery system
- P205/75R14 BSW steel-belted radial ply tires
- Maintenance-free battery

Additional features include:

- Left-hand remote control mirror
- Dual note horn
- Luxury sound insulation package

See page 15 of this section for a complete list of standard equipment.

# FORD LTD CROWN VICTORIA—MAJOR STANDARD FEATURES

## MODELS

2-DOOR SEDAN  
4-DOOR SEDAN

## EXTERIOR

The new Ford LTD Crown Victoria shares some mutual features with the Ford LTD, including:

- Unique grille texture, grille opening panel, parking lamps and road lamps
- Dual rectangular halogen headlamps
- Bright hood, rear and window frame moldings
- Decklid accent tape stripes

Additional features include:

- Dual accent stripes on bodysides and hood
- Rear half-vinyl roof, roof wrapover molding with bright accents and brushed insert, frenched seams and color-keyed backlite molding
- Hood ornament
- Crown ornament on "B" pillars
- Peripheral accent stripes on quarter windows of 2-door
- Wide bright lower door moldings with rear extensions and black rocker panel moldings
- LTD Crown Victoria nomenclature on "C" pillars

## INTERIOR

In addition to or in place of features on the Ford LTD, the LTD Crown Victoria provides as standard:

- Flight bench front seat with fold-down center armrest
- Higher level knit cloth and vinyl seat trim
- Deluxe door trim panels with carpeting on the lower panel
- Color-keyed deluxe belts with comfort regulator feature
- Illuminated, self-regulating electric sweep-hand clock
- 18-oz. color-keyed cut-pile carpeting
- Additional woodtone applique on instrument panel
- Seat belt reminder chime replaces buzzer
- Rear door courtesy light switches (4-door)
- Luggage compartment light

## FUNCTIONAL

The Ford Crown Victoria incorporates all the features of the LTD including:

- 5.0 Liter (302 CID) VV V-8 engine
- DuraSpark electronic ignition
- Electronic voltage regulator
- SelectShift Automatic Transmission
- Power steering
- Power front disc/rear drum brakes
- Coolant recovery system
- Maintenance-free battery
- Left-hand remote-control mirror
- Dual note horn

Additional features include:

- Higher level (super luxury) sound insulation package

See page 12 of this section for a complete list of standard equipment

# FORD LTD S WAGON — MAJOR STANDARD FEATURES

## MODELS

LTD S WAGON

## EXTERIOR

The LTD S Wagon shares many features with the LTD S 4-door model. Some of these features include:

- Chrome-plated bumpers, front and rear
- Front bumper guards
- Chrome-plated grille
- Auxiliary "road lamps" in grille
- Single rectangular headlamps
- Bright door belt, rocker panel, wheelip and drip rail moldings
- Tiltaway door hinges
- Deluxe wheel covers

Additional features include:

- Bright tailgate surround moldings
- Bright quarter window moldings
- Vertical taillamps
- Rear bumper guards

## INTERIOR

The following features are in addition to or in place of those on the LTD S 4-door model:

- All-vinyl seat trim
- Fold-down second seat for added cargo capacity
- Removable color-keyed load floor carpeting
- Lockable side storage compartment
- Lockable underfloor storage compartment

## FUNCTIONAL

The LTD S Wagon shares many features with the 4-door LTD S model. Some of these features include:

- 5.0 Liter (302 CID) VV V-8 engine
- DuraSpark electronic ignition
- Electronic voltage regulator
- SelectShift Automatic Transmission
- Power steering
- Power front disc/rear drum brakes
- Coolant recovery system
- Power ventilation
- Maintenance-free battery

Additional features include:

- Three-Way Magic Doorgate
- Power tailgate window
- P215/75R14 BSW steel-belted radial ply tires
- Conventional spare tire
- 6.5-inch wheels

See page 15 of this section for a complete list of standard equipment.

# FORD LTD WAGON — MAJOR STANDARD FEATURES

## MODEL

LTD WAGON

## EXTERIOR

The LTD Wagon offers the following standard features, which are in addition to or in place of features offered on the LTD S Wagon:

- Unique grille texture, grille opening panel, parking lamps and road lamps
- Dual rectangular halogen headlamps
- Vinyl insert bodyside moldings
- Bright hood rear and window frame moldings
- Tailgate accent tape stripes

## INTERIOR

The LTD Wagon shares all the features with the LTD S Wagon. Some of these features include:

- All-vinyl bench seat
- Fold-down second seat
- Removable color-keyed load floor carpeting
- Lockable side storage compartment
- Lockable underfloor storage compartment
- Deluxe 4-spoke steering wheel

An additional feature is:

- Woodtone applique around instrument cluster and on right-hand panel

## FUNCTIONAL

The LTD Wagon shares many features with the LTD S Wagon. Some of these features include:

- 5.0 Liter (302 CID) VV V-8 engine
- DuraSpark electronic ignition
- Electronic voltage regulator
- SelectShift Automatic Transmission
- Power steering
- Power front disc/rear drum brakes
- Coolant recovery system
- Power ventilation
- Maintenance-free battery
- Three-Way Magic Doorgate
- Power tailgate window
- P215/75R14 BSW steel-belted radial ply tires
- 6.5-inch wheels

Additional features include:

- Left-hand remote control mirror
- Dual note horn
- Luxury sound insulation package

See page 15 of this section for a complete list of standard equipment.

# FORD LTD COUNTRY SQUIRE — MAJOR STANDARD FEATURES

## MODEL

LTD Country Squire

## EXTERIOR

The LTD Country Squire provides the following major features which are in addition to or in place of the features offered on the LTD Wagon:

- Simulated woodgrain panels with planking lines
- Fiberglass side rails with simulated woodgrain finish
- Hood ornament

## INTERIOR

The Country Squire shares all the features of the LTD Wagon. Some of these features are:

- All-vinyl bench seat
- Fold-down second seat
- Removable color-keyed load floor carpeting
- Lockable side storage compartment
- Lockable underfloor storage compartment
- Deluxe 4-spoke steering wheel

Additional features include:

- Deluxe door trim panels with carpeting on the lower panel
- Color-keyed deluxe belts with comfort regulator feature
- Electric sweepband clock
- Cargo area light
- 18-oz. color-keyed cut-pile carpeting
- High gloss, full width woodtone appliques on instrument panel
- Seat belt reminder chime replaces buzzer

## FUNCTIONAL

The Country Squire shares many of the same features of the LTD Wagon. Some of these features are:

- Three-Way Magic Doorgate
- Power tailgate window
- 6.5-inch wheels
- P215/75R 14 BSW steel-belted radial ply tires
- Maintenance-free battery

See page 15 of this section for a complete list of standard equipment.

# FORD LTD — CHASSIS FEATURES

## FRAME

The Ford LTD torque box frame was computer designed. Design features include:

- The front and rear suspensions eliminate the need for crossmembers
- The energy-absorbing bumpers are attached directly at the frame ends for improved structural efficiency
- The number three crossmember, which serves as the engine and transmission rear support, is a full-width tubular design providing light weight
- The number four crossmember is a massive formed steel plate. Upper seats for rear coil springs and mountings for the rear shock absorbers are welded to this crossmember and the side rails
- Body mounts are positioned into the frame to isolate the body from the frame, minimizing noise and vibration

## POWER STEERING

A forward-mounted power steering system is standard on all Ford LTD models. This steering system places the linkage and steering gear forward of the front wheel axis. The lightweight steering pump helps provide extra power that is needed for low speed turning and parking. At highway speeds, the steering pump reduces power to provide a good "feel" of the road.

An additional feature is:

- The rotary valve steering gear provides a responsive 14:1 gear ratio designed for maneuverability

## AUTOMATIC PARKING BRAKE RELEASE

If your vehicle is equipped with the optional automatic parking brake release, the brakes will automatically unlock when the shift lever is moved to any forward gear with the engine running. If necessary, the parking brakes can be released manually by pulling the trip lever located at the upper end of the parking brake pedal arm.

**NOTE** — The automatic release does not operate when the shift lever is in reverse. To release the brake before driving in reverse gear, move the shift lever to a forward position with the engine running or pull the manual release lever.

## FRONT SUSPENSION

The Ford LTD front suspension is designed for riding comfort and responsive steering.

- Computer-selected springs match the weight to reduce road harshness
- A broad based lower "A" arm replaces the lower arm and strut assembly design
- The upper ball joint is a low friction lube-for-life design that improves the ride and road harshness. The lube-for-life ball joint also eliminates the need for periodic lubrication
- Lower ball joints incorporate integral wear indicators that show when service or replacement is necessary
- The rubber-bushed stabilizer bar helps prevent excessive lean when cornering
- The forward-mounted steering gear and linkage helps improve the directional stability and control

## FORD LTD — CHASSIS FEATURES

### REAR SUSPENSION

The Ford LTD rear suspension system incorporates 4-bar link design with coil springs.

Major rear suspension components include:

- Four longitudinal arms that control the position of the rear axle assembly and absorb braking and acceleration forces
- Coil springs mounted over the axle and shock absorbers mounted in front of the axle allow a lighter weight suspension that requires less package space
- Insulators on the coil springs help minimize vibrations from reaching the passenger compartment
- Lower control arms are formed from galvanized steel for improved corrosion protection

- Larger bushings at all attaching points help reduce noise and vibration

NOTE: An optional handling suspension, incorporating a rear stabilizer, is available for 2- and 4-door sedans, and a heavy-duty suspension is available on all models

### FORD LTD SUSPENSION SPECIFICATIONS

FRONT	
Type .....	Independent with Ball Joints and Upper and Lower Control Arms
Springs .....	Coil, Rubber-Insulated from Frame
Shock Absorbers .....	Direct, Double-Acting Hydraulic

Wheel Bearings .....	Taper Roller
REAR	
Type .....	Four-Bar Link Design
Springs .....	Coil, Rubber-Insulated
Shock Absorbers .....	Direct, Double-Acting Hydraulic

### POWER BRAKES

Power front disc/rear drum brakes are standard on all Ford LTD models.

The front disc pad clearance is automatically maintained by the action of the piston. Rear drum brakes are self-adjusting. This adjustment takes place when the brake is applied while the car is moving in reverse.

The parking brake is mechanically applied by a convenient foot pedal and released by a handle below the instrument panel.

## FORD LTD — BODY FEATURES

### BODY CONSTRUCTION

Design features of Ford LTD's body construction include:

- A rigid body construction coupled with body mounts and frame helps provide substantial insulation from road noise and vibration
- Cowl construction features a dry plenum which should reduce the potential for any water leaks below the windshield
- Windshield and rear headers provide firm support for the roof panel
- All roof pillars incorporate "box section construction" for light weight

- The decklid and tailgate are a double panel construction
- The front and rear doors feature double panel construction with weld-on frames and stamped bolt-on hinges
- The reinforced floor pan is welded to the box section rocker panels to form a rigid body structure
- Front wheelhousings feature plastic inner liners for light-weight corrosion protection
- Front end sheet metal is attached to the frame with rubber mounts for insulation from noise and vibration
- The multi-piece radiator support features separate latch support and lower reinforcement to help minimize lateral vibration

# FORD LTD — BODY FEATURES

## BODY INSULATION

There are three levels of sound insulation on 1980 Ford LTD, corresponding to the three designated series: LTD S, LTD and Crown Victoria. The following areas of insulation and sound-proofing are used in the Ford LTD S, LTD and Crown Victoria models to help provide an effective barrier against road and engine noise:

1. The upper instrument panel has 1/2-inch thick resinated fiber
2. The front and rear floor areas have 1/4-inch thick needled fiber, with mastic deadener and 1/2-inch thick resinated fiber attached to carpet
3. 3/8-inch thick resinated fiber is used under the rear seat
4. The package tray strainer absorber is 3/8-inch thick needled fiber and mastic deadener
5. The package tray insulator is 3/8-inch resinated fiber with mastic deadener
6. Side pillars include 3/8-inch resinated fiber with mastic deadener
7. The roof panel uses 3/8-inch resinated fiber
8. Additional sound control stuffer in side cowl area
9. The dash panel has 1-inch molded resinated fiber plus a continuous sound barrier material
10. The hood panel has a 1-inch thick fiberglass pad
11. The front fenders to side cowl seals have thermoplastic polyfin elastomer
12. Sound control stuffer in "B" pillar
13. Cowl top insulator is 3/8-inch resinated fiber with mastic deadener
14. Station wagon models also include insulators and deadeners in the wheelhouse, load floor, third seat well, quarter trim panels, spare wheelwell and in the rear pillars

To the sound-deadening materials listed above, Ford LTD and LTD Crown Victoria sedans and the Country Squire wagon models add the following:

1. The hood panel has a 1-inch thick fiberglass pad with increased density
2. The dash panel has 1-inch molded resinated fiber plus a heavier continuous sound barrier material
3. Cowl side absorbers include 3/8-inch resinated fiber with mastic
4. Models include panel-deadening, heat-bondable mastic on the front floor
5. Door panels include 1/4-inch resinated fiber insulator
6. Additional noise deadener pads in critical areas of body side and roof area

To all of the sound-deadening materials listed above, the Crown Victoria model<sup>®</sup> adds the following:

1. Additional sound control stuffer in lower side cowl
2. Rear rocker panel to wheelhouse junctions have additional sound control stuffer (2-door model) or body sealer (4-door model)
3. Extended panel-deadening, heat-bondable mastic on front floor area

Included with Interior Luxury Group on Country Squire Wagon

4. Additional panel-deadening, heat-bondable mastic added to critical side and rear floor areas
5. Additional sound-absorbing 1/4-inch resinated fiber added to carpet at all side floor areas

## BODY SEALING MATERIAL

The following joint sealers and special anti-squeak and sealing devices are used in all Ford LTDs to help reduce interior noise:

- Plastic sealing material applied to exposed spot-welded body panel seams, joints and any exposed holes on the inner side members
- Heat-curing sealer applied to all other panel seams and joints
- Vinyl-plastic seals on the drip rails and rear deck trough
- Windshield and backlites sealed with butyl tape
- Special pads, grommets, seals and plug buttons to guard against dust and drafts
- Large diameter, tubular weatherstripping with "seal-on-body" design to provide tight seals around all doors

## SEAT CONSTRUCTION

Bench seats are standard on the Ford LTD S, LTD series, and Country Squire models, while a flight bench seat is standard on Ford LTD Crown Victoria models and optional on all other models.

Front seats feature a new thinner shell-type front seat construction. This design not only provides good seat support, it also helps increase more rear seat knee and leg room with good seat support. Molded foam cushions are attached directly to the steel back support and cushion support panels. "Flex-o-lators" (flexible steel straps) are used in the seat cushion.

This trampoline-like construction provides good support while retaining the flexibility needed for enhanced seating comfort. This large support surface beneath the foam should help maintain seat durability.

The front seats are attached to strong roller bearing tracks which provide over five inches of seat adjustment.

Rear seats are constructed of molded foam supported by zig-zag springs.

An automatic inertia seat-back release is standard on 2-door models. When the vehicle is not in motion, or when traveling at steady speeds, this feature allows the front seat to be flipped forward without using any seat-back release latch. But, during any change in vehicle motion (deceleration or cornering) the seat-back is automatically locked in position.

## DOOR CONSTRUCTION

Ford LTD's doors are formed into a sturdy box unit by utilizing a double-panel, welded construction. Bronze-bushed hinges are oil-impregnated for easy door opening effort. A check feature is provided to hold the doors in the full open position and/or at an intermediate door-opening position.

Doors feature "Tilt-a-way" hinges that allow the door to open wider at the top to help provide easier entry and exit.

Ford LTD's door lock system features an anti-theft slide connector and lock cylinder design modifications. The door lock buttons are positioned horizontally at the front of the armrest for additional anti-theft protection.

# FORD LTD — BODY FEATURES

## WINDOW CONSTRUCTION

Side and backlite windows on all Ford models are impact-resistant, heat-tempered glass. The windshield is constructed of two sheets of glass which are sandwiched to a 30-mil thick plastic sheet and heat laminated together. This type of windshield construction also provides pliability, which enables the windshield to take "stretch" under impact, minimizing injury-producing penetration.

## HOOD CONSTRUCTION

Ford LTD's hatch-type hood features double-panel construction.

A new design is the single pivot hinge that holds the hood in an open position.

This new hinge has been designed to require less maintenance and also provide better hood stability or less misalignment than previous hinges.

An inside hood release is standard on all models.

## HEATING SYSTEM

Ford models use a blend-air type of temperature control that is powered by a four-speed blower.

Heat can be directed through the floor outlets, the four instrument panel registers or a combination of both.

A higher temperature thermostat and a less restrictive water heater circuit provide improved performance over previous heater systems.

## POWER VENTILATION SYSTEM

A Power Ventilation System is standard on all Ford models. This feature includes four registers on the instrument panel. When the operator places the heater control selector in the vent position (non-air conditioned cars), outside air is forced into the passenger compartment through the four instrument panel registers and circulates through the interior of the car, providing fresh air with the windows up. Air flow may be increased by using higher fan speeds.

The fan operates whenever the heater selector control is in the "Vent" position, providing air flow even when the vehicle is not in motion. Moving the selector control from the "Vent" position to the "Off" position automatically turns off the fan.

## MINI-FUSE PANEL

Ford LTD models feature a new mini-fuse panel and newly designed fuses.

The panel contains 17 fuse and circuit breakers, plus the provision for 7 accessory fuses and 2 flashers.

The new two-pronged contact fuse replaces the conventional glass and metal tipped design and easily plugs into the panel.

## INSTRUMENT PANEL

The Ford LTD instrument panel was designed for both driver and front seat passengers.

The instrument cluster features the horizontal speedometer, plus warning lights for brakes, belts, engine temperature and alternator. LTD and LTD Crown Victoria models feature woodtone applique around the instrument cluster and on the right-hand panel.

The optional Convenience Group also has warning lights for low fuel and low washer fluid levels plus a trip odometer.

For additional driver convenience, LTDs feature steering column control levers. The top lever controls the horn, turn signals, headlamp dimmer; while the lower lever operates windshield wipers/washers.

To the right of the cluster is the clock, optional on LTD series. In the lower center section are the heater, optional air conditioning and radio controls. This section is color-keyed on LTD models and has a woodtone applique on the LTD Crown Victoria. The right-hand panel features woodtone applique with the large bin-type glove box located below.

Four large air registers are standard on all models.

## LUGGAGE COMPARTMENT

The Ford LTD luggage compartment is designed to provide a low lift-over and a deep well with a spacious amount of luggage capacity (21.3 cu. ft. with an optional conventional spare and 23.2 cu. ft. with the standard mini-spare tire). A wide burloom mat covers the luggage compartment floor and "kick-up" area. Luggage compartment trim is available as an option and is included in the Interior Luxury Group. Included is carpeting on the floor, kick-up area, wheelhouses, side lining boards and spare tire cover. On the LTD S sedan models, standard side lining boards are not available, but are included with the luggage compartment trim option.

## MINI-SPARE TIRE

The standard mini-spare tire provides two additional cubic feet of storage space for 2- and 4-door models. The mini-spare comes inflated, and because of its smaller size and lighter weight, it is easy to remove from the trunk and attach to the wheel. The mini-spare is designed only for temporary, emergency use and may be used at speeds up to 50 miles per hour.

## FORD LTD STATION WAGON — BODY FEATURES

### As a Tailgate

#### THREE-WAY MAGIC DOORGATE

All Ford LTD wagons provide the famous three-way doorgate; a feature that has helped contribute to Ford's continued station wagon sales leadership.

The Magic Doorgate folds down like a tailgate or swings open like a door, with the window up or down. A safety interlock system requires that the glass be lowered before the door can be used as a tailgate. A safety lock button prevents accidental opening of the doorgate from the inside. When the button is depressed, the door can be opened only with the key or the optional electric power tailgate lock.

The convenient electric power tailgate lock, which is operated by a button located on the driver's or the right front passenger's armrest, is available as part of the Power Lock Group or Convenience Group. A power-operated tailgate window is standard on all wagon models.

#### LOAD COMPARTMENT

In the load compartment, one easy motion folds the second seat into the floor and converts the rear compartment to a flat floor. Optional dual-facing rear seats also fold flat into the floor. An under-the-floor, lockable storage compartment is standard on all wagons. Load floor panels are covered with removable color-keyed carpeting.

The station wagon cargo volume index is 89.7 cubic feet, plus additional underfloor capacity of 9.9 cubic feet on 6-passenger models or 7.6 cubic feet (with cushions removed) on models equipped with optional dual-facing rear seats.

#### SPARE TIRE EXTRACTOR

A simple but effective spare tire extractor is standard on Ford LTD station wagons. It provides a convenient method of removing the spare tire from the wheelwell in the right rear quarter panel. The extractor consists of a plastic sling fastened at the front of the spare tire well with a handle at the rear. The sling is underneath the tire, and the handle is held by a clip in the well. To remove the tire, the hold-down wing nut and jack base are detached, and the handle is disconnected from its retaining clip.

Pulling up and to the left on the handle then lifts the tire out of the wheelwell onto the load floor.

#### LOCKABLE SIDE STORAGE COMPARTMENT

The convenient and practical side storage compartment provides nearly two cubic feet of lockable storage space.

## HIGH ALTITUDES

The optional 5.8L engine on Ford LTD includes Electronic Engine Controls. In addition to the other features of Electronic Engine Controls, they are inherently altitude compensating because they adjust the air/fuel mixture to maintain a nearly constant ratio, and adjust spark advance with barometric pressure. These features provide improved performance at higher altitudes.
